

Reliable, Innovative, Robust, Durable Door

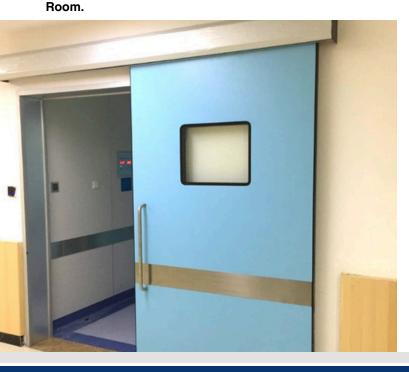

Automatic Hermetic Sliding Door

Clean Room Door

Advantages

- · Latest design in the industry, includes enhanced features.
- A 3-tier seal on all three sides and a 2-tier seal on the bottom ensure complete hermetic sealing from all four sides.
- This hermetic sealing maintains the necessary positive pressure inside the O.T./Clean Room, minimizing air exchanges.
- The high-quality anodized aluminum and premium HPCL materials are durable, withstanding abrasion during cleaning and sterilization of the O.T./Clean Room door.
- The automatic hermetic door prevents air turbulence, ensuring the sterile environment inside is maintained.
- Self-lubricating, high-quality nylon wheels ensure smooth, noise-free operation.
- The 3-D door movement during closing and 2-D adjustment for wheelchairs ensure optimal sealing and precise adjustment tolerances.
- In case of fire, the door helps stop the spread of smoke, allowing more time for evacuation.
- The lever handle enables easy and smooth opening, while the design accommodates trolleys, wheelchairs, and heavy equipment movement in and out of the O.T./Clean

Application

- Operation Theaters
- Intensive Care Units (ICU)
- Laboratories
- Sterile Rooms
- Pediatric Wards
- Quarantine Areas
- Clean Room Lobbies
- X-Ray Rooms
- Fluoroscopy Rooms
- Radio Therapy Rooms
- Mammography Rooms
- Pharmaceutical & Food Industries
- Clean Room
- Hospitals

Preference

- Manual Operation
- Vision glass customized sizes over and above than standard(350x350mm) size
- Mechanical Lock
- Door handle types i.e. Special NA01 type Lever, D-Grip, Flush-Grip
- Door blade with a wide range of colors Choice
- Door blade color matches with inside and outside of the OT/Clean Room Door.

Specification

Track:

A high-grade aluminum extrusion profile designed to support doors weighing up to 3000mm x 2400mm, featuring deep indentations to ensure a perfect hermetic seal.

Canopy:

For HPCL doors: A powder-coated galvanized sheet spans the full length of the track, with a sloping top and closing caps.

Door Blade: The door core is 60mm thick and constructed with: For HPCL: 4mm thick HPCL (High-Pressure Compact Laminate) on both sides of the door to provide enhanced strength and rigidity. Chloro Fluoro Carbon (CFC)-free, high-density polyurethane foam (density 40 kg/m³), with a thickness of 52mm, for superior insulation.

Door Profile:

The door core is encased in 2.5 mm thick, high-grade aluminum extrusion profiles with a natural anodized finish of 15 microns. The aerodynamic design of the profiles ensures the door is durable and robust within its segment.

Gaskets: The door blade features a 3-tier, specially designed, heavy-duty replaceable EPDM gasket along three sides against the wall frame. The bottom is sealed with a 2-tier heavy-duty EPDM gasket, ensuring a flush fit with the finished floor.

Vision Glass: A high-quality, double-glazed flush vision window measuring 350mm x 350mm. Both sides are flush with the door blade for a seamless look.

Wall Frame: The wall frame is made of high-grade aluminum extrusion with a natural anodized 15-micron finish. It's a 3-sided blind frame, fixed with cladding on both the inside and outside of the wall cut-out section.

Cladding: The wall cut-out section is covered with 1mm thick high-pressure laminate, adhered to a 9mm high-density particle board for additional strength and durability.

Weight: The total weight of the complete door blade is approximately 60 kg, with the plank and track assembly also weighing around 60 kg.

Our esteemed client list includes

Automobile	Contruction	IT Sector	Pharma And Foods	Hotels, Malls, Enterainment	Others
Tata Motor	Rohan	Infosys	Tetra Park	J W Mariott	Sandvik Asia
Bajaj	Ashoka Buildcon	AXA	Nestle	IBIS Hotels	KSB
